Dauphin

Twyla is an FASD Diagnostic Coordinator with Prairie Mountain Health covering the Dauphin/Swan River region. She is passionate about raising awareness and providing education to community and service providers about Fetal Alcohol Spectrum Disorder. She assists and supports families as they navigate the process of an FASD assessment in partnership with the Manitoba FASD Network. Additionally, Twyla has worked as a coordinator with the InSight mentoring program, which supports women using an evidenced-based FASD prevention model. She also brings with her a strong background in the field of addictions. Twyla is a Registered Social Worker.

Presentations can be tailored to the audience. They can include FASD 101, prevention, destigmatization, assessment and referral process, the areas of impairment (brain domains), strategies for home/school, and all ages including preschoolers, children, adolescents and adults.
